

**Care Instructions:**

The best way to prevent your jewellery tarnishing is to store clean, dry silver in a dry airtight container, like a ziplock bag or a sealed box. Don't leave silver jewellery in the bathroom. Humidity can speed up the oxidation process that produces tarnish. Do not allow your jewellery to come into direct contact with chemicals or acids such as household cleaning agents, cosmetic products, hand lotions, perfume, hairspray, oils etc. Avoid wearing your jewellery while sleeping. Remember: it should be the last thing put on before leaving the house, and the first thing removed when returning home.

**Warning:** Not suitable for children under 3 years due to small parts.
